RG-350

Ergonomics in all stages

The manual feeder ergo loop is equipped with HALLDE Power Link which gives you a leverage effect from the pusher plate. This results in almost 50 percent less manual power. For a better working posture, the pusher plate has a looped designed handle, HALLDE ErgoLoop, which means you can work with both your left and right hands. The leaning design means that the feed cylinder is always positioned at the right angle – the machine is easy to top up. We recommend our vertically adjustable machine table to ensure you always work at the right height when using the machine.

Safe and quick top ups

The machine stops as soon as the pusher plate is swung aside. When it is swung back the machine restarts and you can continue working. All thanks to an automatic start and stop function. A clear advantage, particularly when larger volumes are involved.

Double safety against unprotected cutting tools

If the feed cylinder is removed when the pusher plate is swung aside, the power is cut. Thanks to this double security there is no risk of the machine starting with an unprotected cutting tool.

Developed for the best hygiene

The RG-350 is manufactured solely from hygiene certified material. The machine has smooth surfaces, rounded edges and has no unnecessary recesses where food might penetrate and get stuck.

Easy cleaning

For quick cleaning, all loose parts are simple to remove for easy rinsing of the machine. The pusher plate and feed cylinder are removable and can be cleaned under running water.

Only the best material

Machine base, feed cylinder and pusher plate are all made of robust metal. Only top quality stainless steel is used to manufacture the cutting tool knife blades.

Highest possible reliability

The powerful motor has a high starting and running torque and powers the direct-driven cutting tool. No belts or intermediate connections. The power from the motor goes via a maintenance free gear drive. This makes the RG-350 an exceptionally reliable machine – irrespective of the products you are preparing.

Cutting tools with complete register

You choose the cutting tool you need to improve efficiency throughout the kitchen. The RG-350 slices, dices, shreds, grates, cuts juliennes, crimping slices and potato chips – everything from firm to soft products. The large 215 mm cutting tools enables faster processing. The knife blades and grating plates are replaceable. As a result you do not need to buy new cutting tools.

Always perfect cutting results

The rotation speed of the cutting tools is optimised for cutting fine and even slices as efficiently as possible. The knife blades are purposely sharpened to avoid inertia or the edge breaking off.
